## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 38 is rejected under 35 U.S.C. 102(b) as being anticipated by

Rajeevakumar U.S. Patent 5,065,273.

Rajeevakumar discloses an integrated capacitor formed in a trench having a width of no more than about 0.18 micrometers an aspect ratio of about 40:1, comprising; a dielectric layer 24 lining the trench; and a conductively doped, as-deposited polysilicon layer 26 filling the trench (see figure 4) wherein the trench is formed in a semiconductor substrate 10.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 2812

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 33, and 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rajeevakumar U.S. Patent 5,065,273 in view of Vo U.S. Patent 5,097,381.

Rajeevakumar is applied as above but lacks anticipation on forming the trench to a depth greater than 10 micrometers. Vo discloses trench capacitors having a trench depth greater than 10 micrometers (see column 5, lines 35-47). In view of this disclosure, it would have been obvious to one having ordinary skills in the art at the time the invention was made to form a trench having a depth greater than 10 micrometers in the primary reference of Rajeevakumar in order to obtain a desire capacitance value.

6. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rajeevakumar U.S. Patent 5,065,273 in view of Vo U.S. Patent 5,097,381 as applied to claims 33, and 35-37 above, and further in view of Mazuré et al. U.S. Patent 5,677219A.

Rajeevakumar as modified by Vo is applied as above but lacks anticipation on disclosing Arsenic, as an impurity comprised in the conductively doped polysilicon. Mazuré et al. discloses arsenic as an impurity comprised in a conductively doped

Art Unit: 2812

polysilicon used in a trench capacitor, in view of this disclosure, it would have been obvious to a person having ordinary skills in the art at the time the invention was made to used arsenic as an impurity comprised in the conductively doped polysilicon as disclosed in Mazuré et al. in the primary reference of Rajeevakumar as modified by Vo if it is desire to use an N-type substrate as the semiconductor substrate.

***Response to Arguments***

7. Applicant's arguments with respect to claims 33-37 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 09/764,711

Art Unit: 2812

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Witek et al., Muller et al. and Sandhu et al. disclose high aspect ratio trench capacitors.
